

LAB 1.4. Website Layout

Suggest layout for your website (use HTML5 + CSS3 + JavaScript + Bootstrap)

Refer to: https://www.w3schools.com/html/html_layout.asp

Your website interface contains:

- Header (company logo, company name, ...)
- Navigation buttons, links,
- Body
- Footer

Example of navigation bar

Make sure you use “responsive design” with Bootstrap

For your layout:

- Choose appropriate **sizes** of all the parts of your web page interface
- Choose appropriate **foreground colors** and **background colors** (refer to the **Color Wheel**, search this keyword from Google search engine)

Submission

- Complete your layout + interface
 - Make sure your interface looks nice, like a **real** web page interface
 - Make sure you use margin and padding correctly
 - **Don't use table** to create your web page layout
