# LAB 4.2 Pagination and Lazy Loading

4.2.1 Get back to the exercise where you show the list of items, if the list long, organize the items into different pages (pagination), let the users choose the number of items in 1 page (i.e. 20, 40, 50,
100, …) Write programming code in PHP to complete this.

4.2.2 Use Lazy Loading to load the same items as in 4.2.1. Your users can scroll down the page they can see the items loaded.
